

**Dad** is in hospital after falling and breaking his hip. He is due for discharge but seems to have lost the confidence to manage on his own.

**Dad and I have talked to the occupational therapist who will:**

- **Assess** Dad's ability to look after himself.
- **Make suggestions** to improve safety at home.
- **Ensure** that he can drive safely.

Dad is feeling more confident about his return home and is looking forward to meeting his friends at the coffee shop again.

Because of occupational therapy, I know Dad will be okay.
